

# The VERIFY STUDY

Validation of Early Prognostic Data for Recovery Outcome after Stroke for Future, Higher Yield Trials

Newsletter August 2023 Issue 20

"The PIs wanted to highlight a fun fact about ourselves. I am a Bollywood singer and am part of a music band for the past 15 years!

I want to sing about the fact that we are seeing improvement in obtaining our primary data and want to thank everyone for working hard to ensure these measures are obtained. Please continue to do your best to collect this data and feel free to reach out to us with any questions."

- Achala Vagal, MD, MS

**Total Subjects Enrolled!!!**

# August

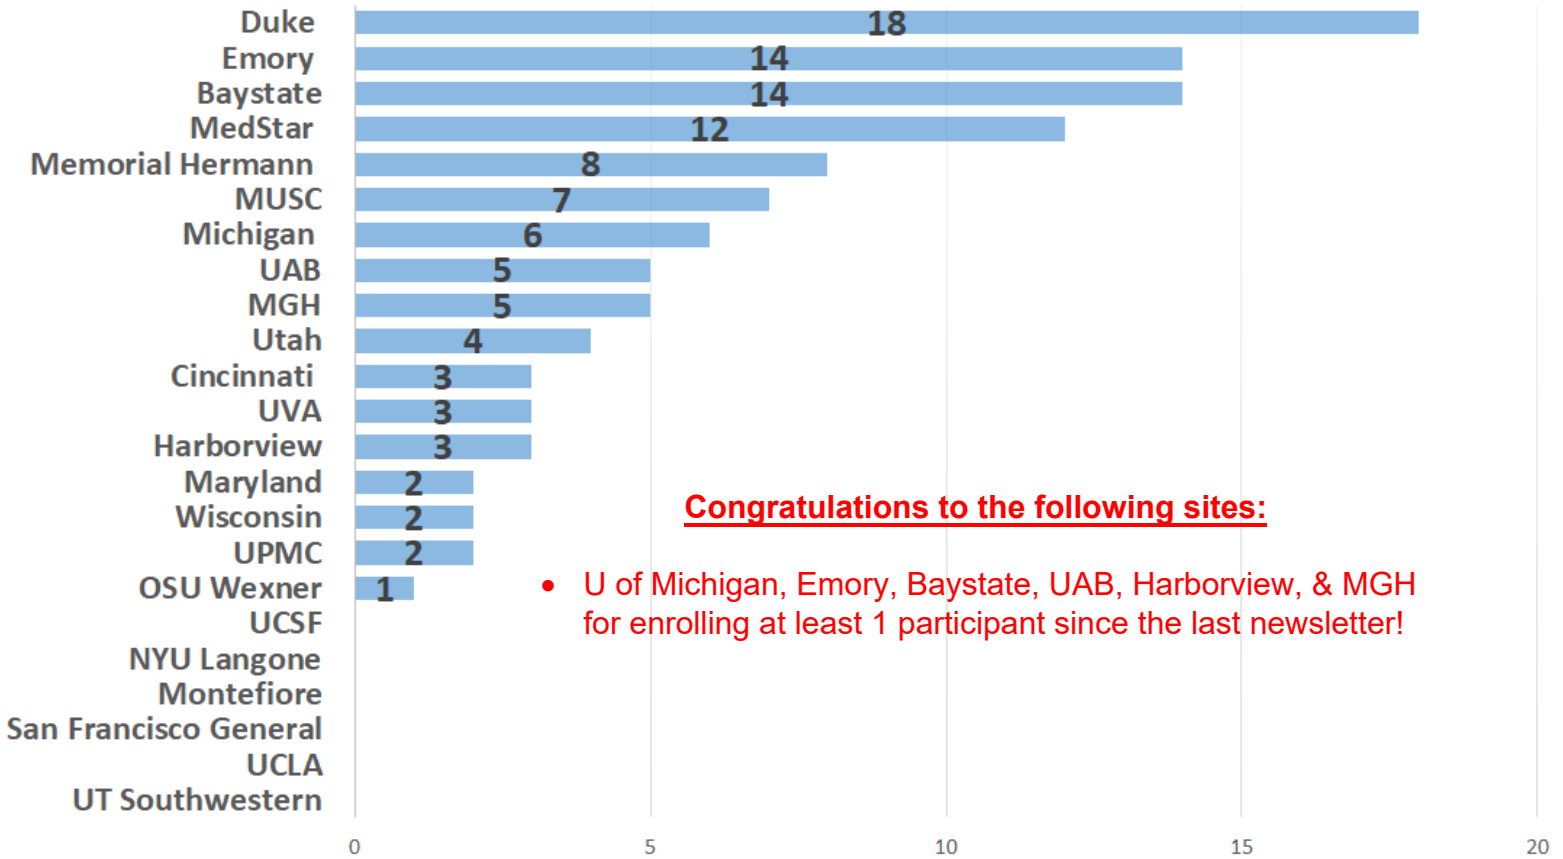

## New enrollments since last newsletter

- U of Michigan +1
  - PI- **Dr. Krishnan** PSC- **Shannen Bolde**
- Emory, +1
  - PI- **Dr. Borich**, PSC- **Susan Murphy**
- Baystate, +2
  - PI- **Dr. Schlaug**, PSC- **Sirisha Nouduri**
- UAB, +2
  - PI- **Dr. Gropen**, PSC- **Tammy Davis**
- Harborview, +1
  - PI- **Dr. Mazwi**, PSC- **Mary Grace Asiro**
- MGH, +1
  - PI- **Dr. Lin**, PSC- **Julie DiCarlo**

# Enrollment Graphs

**VERIFY TOTAL ENROLLMENTS: 109/657**

**Congratulations to the following sites:**

- U of Michigan, Emory, Baystate, UAB, Harborview, & MGH for enrolling at least 1 participant since the last newsletter!

## WebDCU- Site Regulatory Reminders

- Please remember to obtain **expired** or **soon to be expired** training certificates from site personnel. These updated training certificates should be uploaded into WebDCU under the **People Document** section.

- If there is a lapse in training between expired and updated training certificates, then a **note-to-file (NTF)** explaining that the site staff did not perform assessment while their training certificate was expired should be uploaded with the updated training certificate.

**\*\*It is the site's responsibility to ensure that all site staff are up-to-date with training\*\***

Expired training

Legend: ■ Current ■ Expired ■ Waived ■ Missing

## WebDCU- Issues Table

For studies using Advarra as the cIRB, the **Issues Table** was created in WebDCU to report the following:

- Protocol Deviations, Violations, or Exceptions.
- Unanticipated Problems.
- Non-Compliance of cIRB Requirements
  - Serious or Continuing Non-Compliance
- Audit findings at your site.

When entering an event into the Issues Table, please use the following format:

- Describe the issue
- Describe how the issue was resolved or managed.
- Describe corrective measures or preventative actions that were put into place to minimize/prevent the event from occurring again in the future.

# Reminder: Staff Roles at Each Clinical Site

## PREMISES FOR STUDY STAFFING:

1. Strongly preferred that FM and ARAT are performed by PT/OT
2. The study requires that FM at Study Visit 2 & 6 are performed by same person
3. Neither TMS operator nor TMS assistant should do 90-day FM or ARAT
4. Site PIs may not have daily availability at many sites
5. Individual variations to recommended model may be needed

## STAFF MEMBERS TO BE TRAINED AND CERTIFIED AT SITES:

1. Site PI
2. 1<sup>o</sup> SC
3. 1<sup>o</sup> PT/OT
4. At least one additional staff member(s) and more encouraged
  - 2<sup>o</sup> SC or 2<sup>o</sup> PT/OT

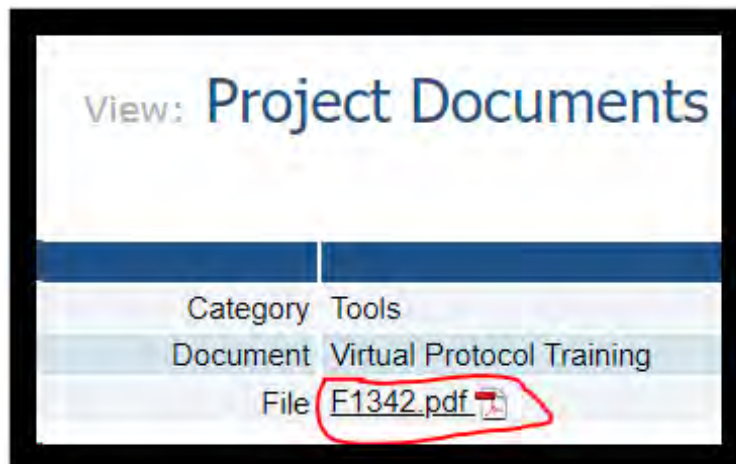

Please Train **2 People** for Each Sets of Trainings:  
 (1) TMS Operator (2) ARAT+FM, & (3) Other Behavioral Assessments

## RECOMMENDED VERIFY SITE TEAM MODEL

	Visit 1: Screening/Consent	Visit 2 & 3 (Inpatient)			Visit 4: Post-TMS Hospital Assessment (DC Day or D5 Post-TMS, whichever is Sooner)	Visit 5: Post-hospitalization Phone Follow Up (30d)	Visit 6 (90d) (Outpatient)	
		Baseline Clinical Assessments and MRI Facilitation (except FM)	FM	TMS Operator (TMS-trained)			TMS Assistant (no training)	FM and ARAT
1 <sup>o</sup> SC	X	X		X	X	X		X
1 <sup>o</sup> PT/OT			X				X	
2 <sup>o</sup> SC or 2 <sup>o</sup> PT/OT				X				
Site PI	Supervisory, may serve PT/OT or TMS role in some sites, or be available for backup in other sites							

## Virtual Protocol Training Slides

- Reminder: The **virtual protocol training** slides are available in the Toolbox tab in WebDCU.
  - Information regarding study related trainings & how to access these trainings are located in this slide deck.
  - This slide deck can be a helpful tool when onboarding new study team members at your site.

## Missing Primary Data

### Data as of 07Aug2023

- Of 73 patients who have reached 90 days post stroke onset
  - 29 (39.7%) have incomplete primary data
  - Either/both unusable or unobtained:
    - Biomarker - MEP status or MRI lesion 3D-T1 (n=13)
    - Primary outcomes - 90d FM/ARAT data (n=19)

The study was designed to tolerate **no more than 20%** missing primary data.

- **Need to see improvement in obtaining primary data. We greatly appreciate your assistance in addressing issues that are under your control!**

# Actions to Address Missing Primary Data

## • 90-Day FM/ARAT

- ✓ Emphasize 90-day in-person visit for eligibility
- ✓ Schedule 90d visit before DC
- ✓ Coordinate 90d visit with SOC visits
- ✓ Troubleshoot transportation
  - ☐ Remember study willing to pay more than \$40 for travel for participant or study team if necessary
- ✓ Keep in touch after DC
- ✓ Collect alternate contacts for LTFU
- ✓ Text/email/call them, at least 3 attempts
- ✓ Remind of payment for their time
- ✓ Check EMR and case worker if can't find them
- ✓ Offer minimal visit for just FM/ARAT if resisting
- ✓ Certified letter

## • RECAP of TMS Tips

- ✓ Maximize pt comfort and tolerability
- ✓ Remember to do bilateral facilitation
- ✓ Repeat TMS if needed

## • RECAP of MRI Tips

- ✓ Schedule early
- ✓ Discuss with MRI tech
- ✓ Remind clinical team of importance of this study
