

# 2020 Annual Survey Results

---

Logan Sirline

NIH StrokeNet NDMC

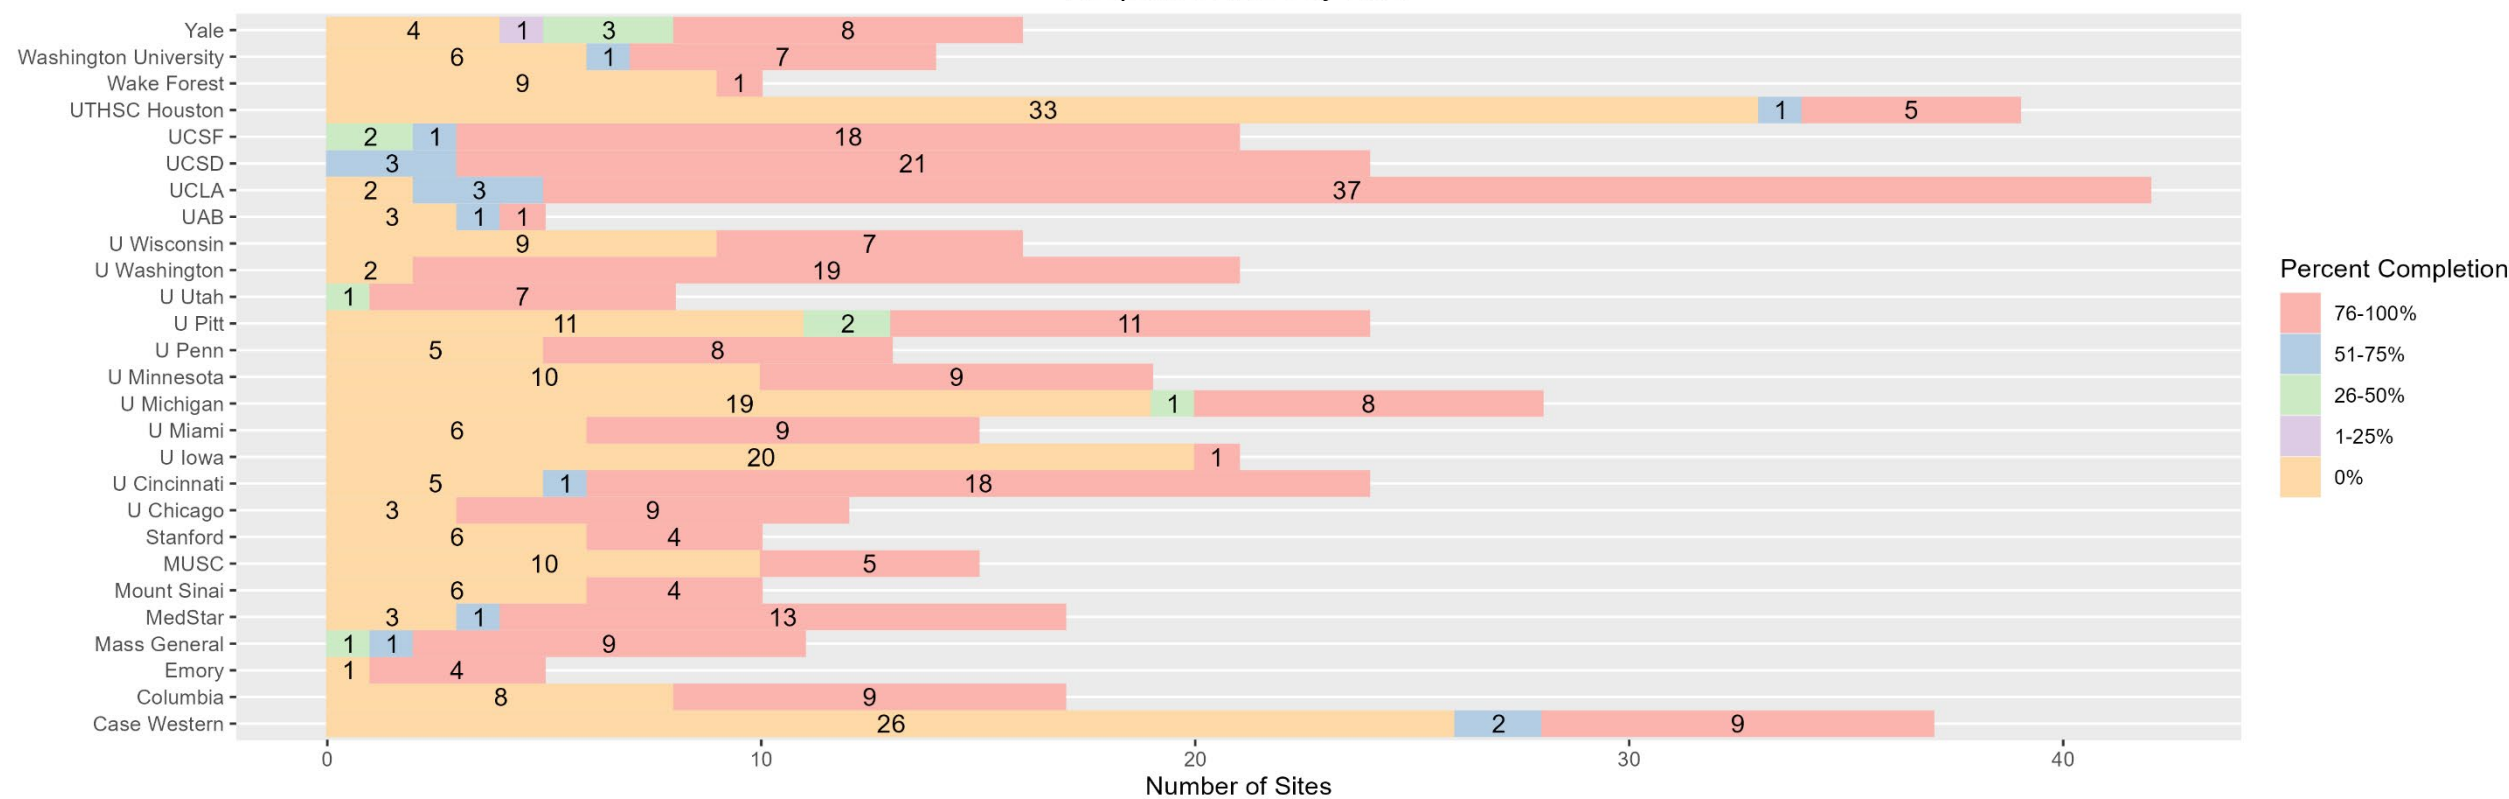

October 2021

# Survey Overview

- 289 sites completed the survey as of October 8, 2021
- 2020 survey results cannot easily be compared to previous annual survey
- 2020 survey has 49 questions vs. 117 in the previous survey

Response Rates by RCC

	With Data	Median	Min	Max
Total number of inpatient beds	267	450	56	2678
Ischemic stroke patients admitted	259	411	2	2245
ICH patients admitted	259	90	0	1142
SAH patients admitted	258	32.5	0	250
Patients treated with IV rtPA at this hospital's emergency department	254	48.5	0	580
Acute endovascular reperfusion therapies performed	246	51.5	0	275
Number of new stroke patients seen in outpatient rehabilitation clinic	90	104.5	0	3666

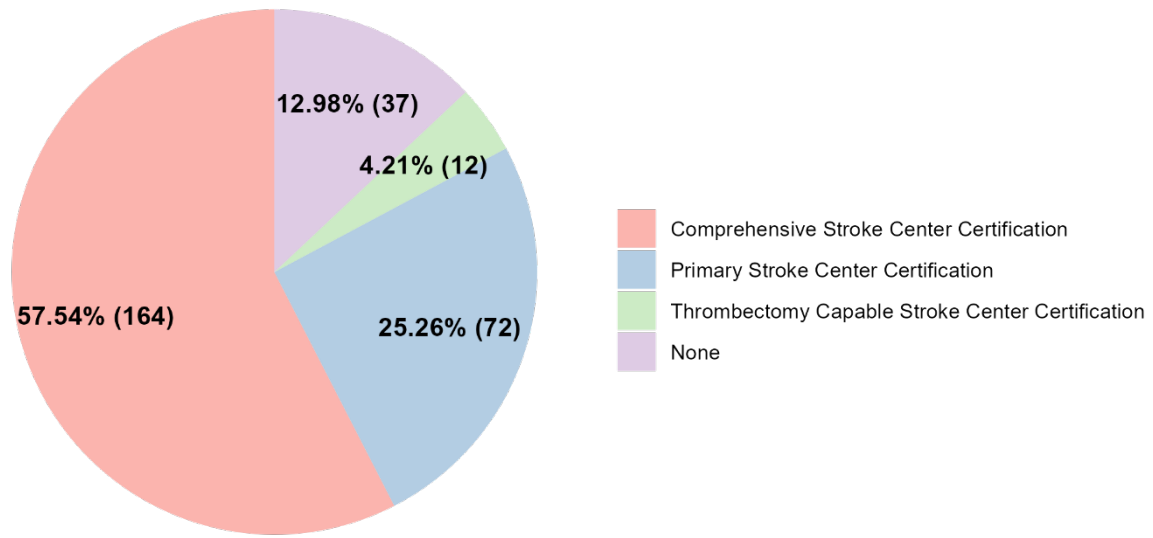

### Source of Responses

AHA GWTG Registry	175	61%
Other registry	123	43%
Estimation	64	22%

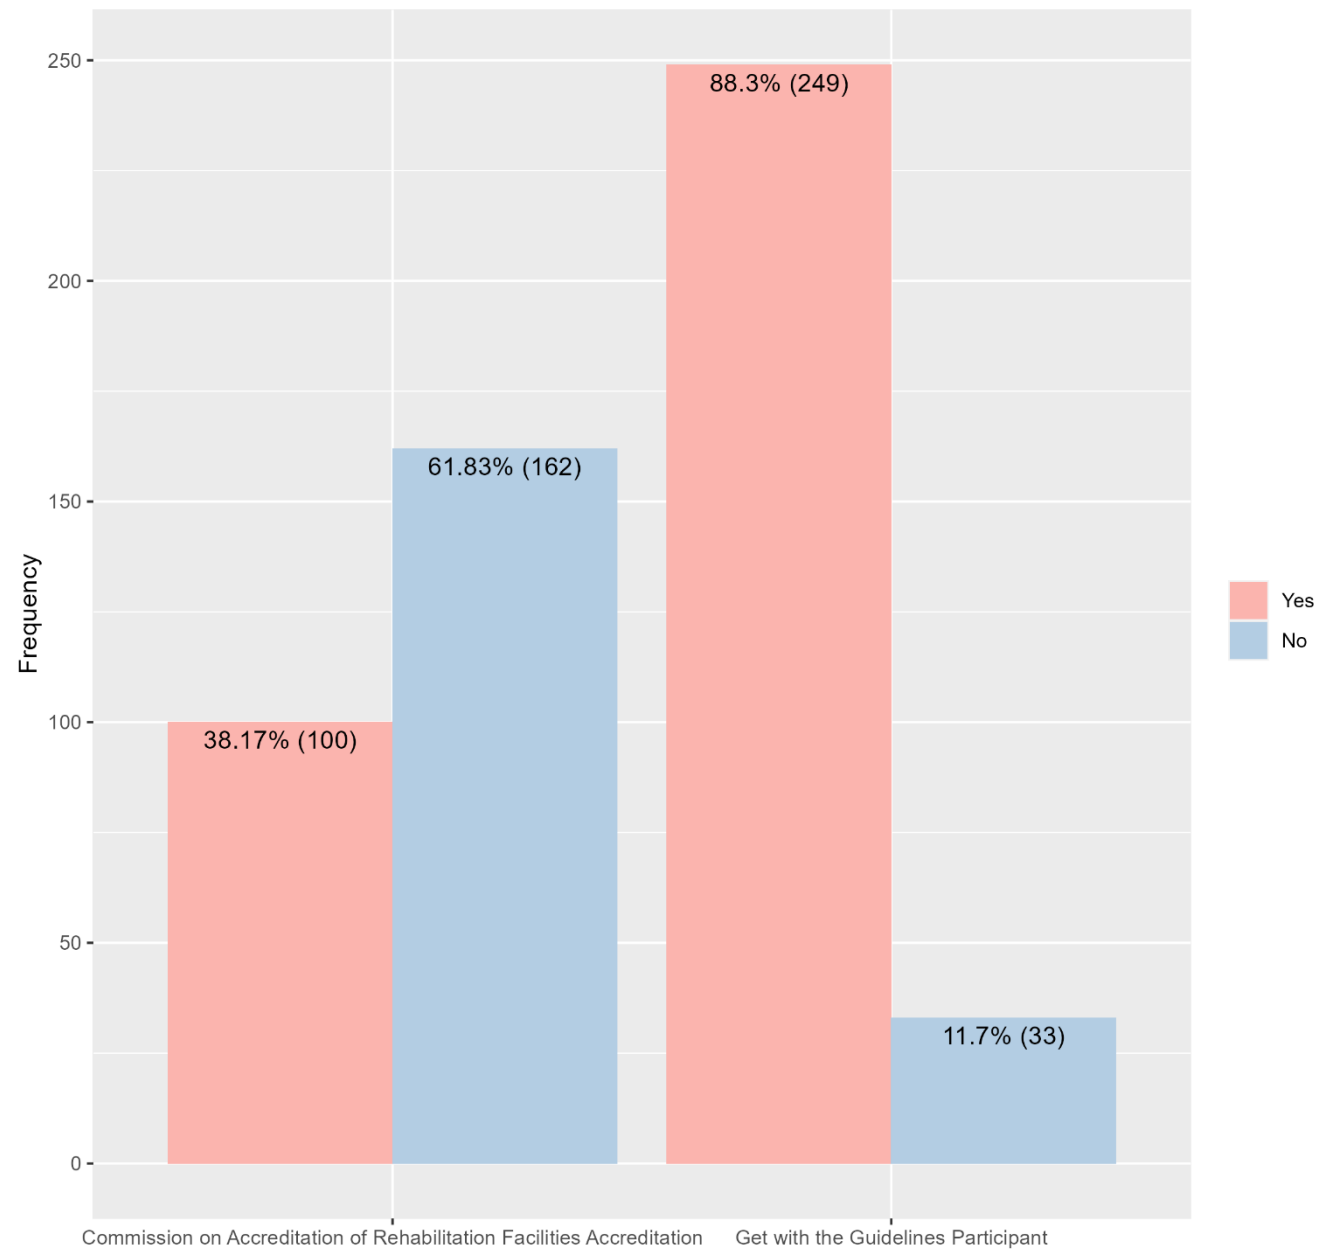

Survey Data as of 10/8/2021 @ 11am

Facility type	Count	Percent
Adult only	198	69%
Adult and Pediatric	76	26%
Pediatric only	15	5%
Inpatient only	70	24%
Inpatient and outpatient	214	74%
Outpatient only	5	2%
Acute only	126	44%
Acute and rehabilitation	154	53%
Rehabilitation only	9	3%

Area of Pediatric Stroke Research Performed at This Site

Survey Data as of 10/8/2021 @ 11am

# Next Steps

- NCC Contracts & NDMC will work to collect the missing surveys
- If a site has not completed the survey in WebDCU and they are not actively participating in a study, they will be marked as “inactive”
  - RCCs will provide an updated site list to the NCC & NDMC
- Survey responses will be required before a site can be added to another study
- Removal of sites that will not participate

The background features a complex network of nodes and lines. Nodes are represented by small circles in various colors: red, green, blue, orange, and black. These nodes are interconnected by a dense web of thin, grey lines. The overall shape of the network is roughly circular, with many lines radiating from central nodes to peripheral ones. The background is a light grey gradient.

# THANK YOU!
