

Endovascular Advisory Committee

- Colin Derdeyn, University of Iowa - Chair
- Sam Zaidat, Medical College of Wisconsin - Vice-Chair
- Alex Khalessi, UC San Diego
- Allan Brook, Montefiore
- Mike Froehler, Vanderbilt University
- Rocco Armonda, Georgetown University
- Wade Smith, UC San Francisco
- Reza Jahan, UC Los Angeles
- Tudor Jovin, University of Pittsburgh
- Joe Broderick, University of Cincinnati (non-voting)
- Rose Beckman, University of Cincinnati (non-voting)

Charge

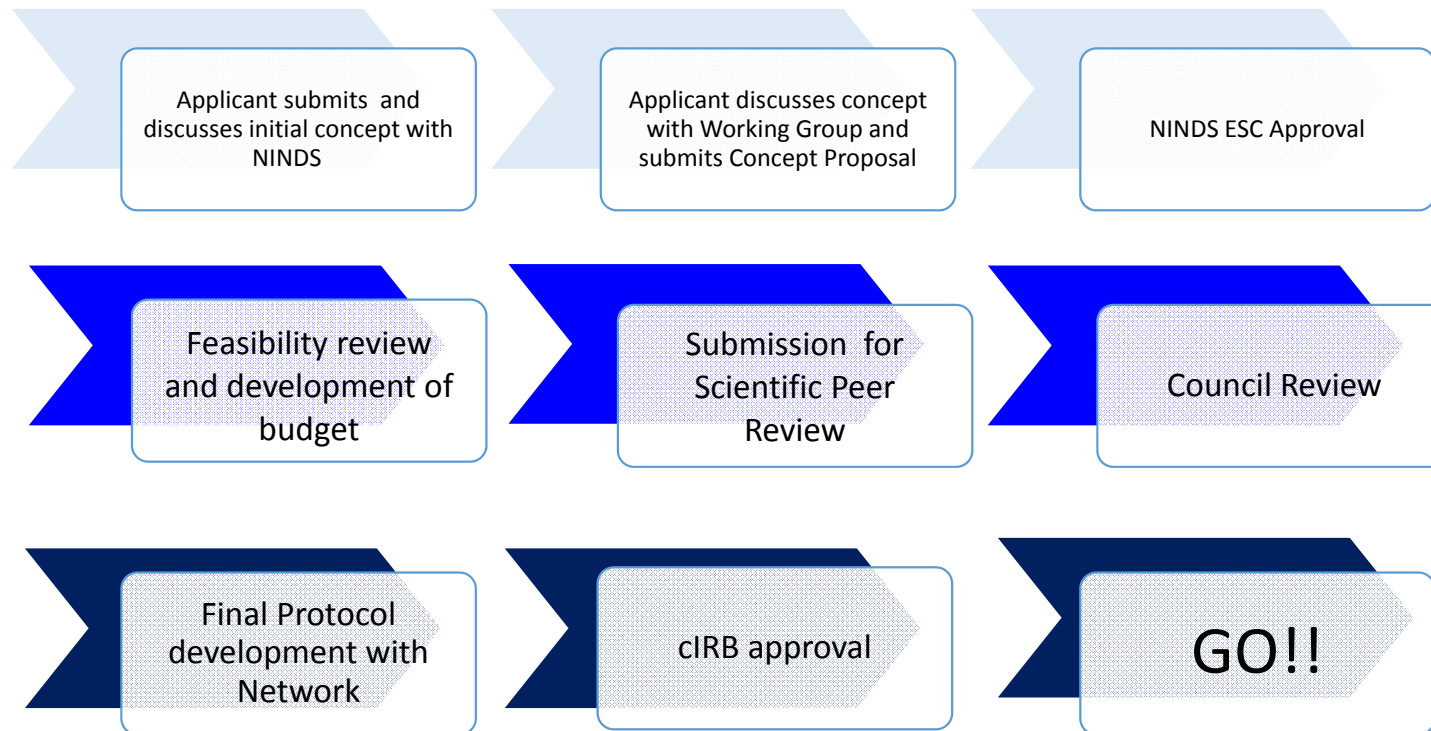

Advise PIs and the StrokeNet Executive Committee on issues related to endovascular treatment of study patients, including planning and execution phases of studies.

These issues include workflow, recruitment, inclusion/exclusion criteria, treatment protocols, devices, performance and quality metrics, and safety and safety monitoring.

Standing Recommendation

Acute stroke treatment trials that involve endovascular intervention (either as an experimental intervention or as part of standard of care) should have an endovascular executive investigator to supervise the endovascular aspects of the protocol and study execution, and serve as a liason to this committee

Process

Work to Date

Protocol review for MOST (pre-submission) and DEFUSE III (post-award)

Identified liaisons for MOST, DEFUSE III, ICTUS
