Reminders

- Televisits for 3 and 6 month assessments are not allowed, per protocol. Visits can be done in person at your site, at the subjects home, or over the phone
- Subjects should always be added in WebDCU first! This will produce a subject ID that will then need to be entered in KOEO
- Please encourage subjects who want to discontinue CPAP use/care management to return for 3 and 6 month follow-up assessments nonetheless
- Please use the informed consent checklist every time you consent a subject, the checklist can be found here: https://www.nihstrokenet.org/sleep-smart-trial/research-team
- Please remember to enter all subjects who meet criteria for enrollment, but decline participation, into WebDCU under Study Progress tab > Screen Failure Report
- All 3 and 6 month assessments must be conducted by a blinded assessor
- Remember to upload all CIRB Modification Letters to WebDCU in the CIRB Approved Administrative Amendments space holder

Have webinar ideas or topics you want to see covered? Let us know!

WebDCU: Alerts tab

Next Webinar

Everyone should now be able to see the 'Alerts' tab in WebDCU. This tab gives an easy and quick overview of all the issues that need to be addressed including:

March 23, 2020
1-2pm ET

- Open DCRs
- Responded DCRs
- Open rule violations
- Pending, missing, expired, and rejected reg docs

When the Alerts tab is highlighted in red, that means that there is an issue that needs to be addressed

Unreachable intervention subjects

FusionHealth is sometimes unable to reach some intervention subjects. When this occurs, Rebecca from Fusion may contact you to ask you to reach out to the subject. People are more likely to respond to the local research team they know!

Sleep SMART Coordinator of the month

Congratulations to Sadie Caldwell!
University of Cincinnati Medical Center, Cincinnati, OH

Sadie was chosen as the coordinator of the month for her dedication to Sleep SMART. Sadie has worked tirelessly with respiratory therapy to integrate Sleep SMART into their workflow and with RT and nursing on troubleshooting NoxT3 and CPAP issues. She has been getting in to see patients on day 1 to decrease the odds of discharges prior to run in night completion. In addition, Sadie's sunny disposition and calm demeanor make subjects feel instantly comfortable, allowing her site to be successful as they continue to move up on the randomization leader board. The University of Cincinnati study team has now successfully randomized 10 subjects. Sadie has also been willing and eager to share with other site coordinators how she created order sets for the respiratory therapy staff in their EMR.

If you know a coordinator who should be featured, please let us know!

New Study Team Members

Emily Herreshoff: Emily will be helping out on Sleep SMART while Kayla is on maternity leave starting in April. She is at the University of Michigan with the Prime PIs. Her email is egalopin@umich.edu

Rebecca Hankla: Rebecca has joined the Sleep SMART team at FusionHealth. She spoke on our webinar on 2/24 about care management. If you have a subject randomized into the CPAP arm, you likely have received emails from her.
